

**Agriculture Finance New Product Launch:
ProPartners Financial Launches AgriSpan**

Jul. 25, 2008

Source: ProPartners news release

ProPartners Financial recently launched AgriSpan, a new suite of financial products developed specifically for agribusinesses and producers. AgriSpan enables participating businesses to offer full-spectrum financing to their producers. This new financial package is not intended to replace existing branded finance programs already in place with partner businesses, but instead provides an additional financing option.

Producers appreciate the competitive rates, quick access to funds and flexible repayment terms, and are able to use AgriSpan financing for dealership purchases, operating lines of credit, and grain inventory loans.

"We designed AgriSpan with producers in mind and believe the real value is the convenience. Producers are able to do one-stop shopping with the dealers they already have business relationships with, such as input supply companies, seed companies, implement dealers and the like. Producers can secure financing at the same place they make purchases. Easy process, competitive terms and ag lending expertise, that's what producers want and it's what we're giving them," states Howard Huebner, VP of business development for ProPartners.

The AgriSpan operating and input loan provides capital for crop nutrient and protection products, seed, fuel, custom work and services, rent, labor, irrigation expenses and repairs. Additional AgriSpan loan products are available for inventory, machinery and equipment, real estate and revolving loans.

Agribusiness owners wishing to provide this service for their customers can contact the ProPartners Financial Business Development office at 701-239-1785. Producers may also contact ProPartners directly or download the one-page loan application at www.thepartners.com/AgriSpan.
