

**New Machinery Product:
New Kuhn Bale Processor, Blower and Feeder**

Kuhn North America, Inc., of Brodhead, Wisconsin, introduces two new Primor bale processor, blower and feeder models. These machines are an excellent choice for livestock managers and other operators where the goal is to utilize 4' wide round and square bales for bedding, feeding, or mulching. A fully-mounted model with a capacity of 76 cubic feet and a trailed model with a capacity of 106 cubic feet are available.

The Primor provides even bedding discharge at distances up to 60' and can also feed hay or haylage from bales directly into a feed area. The standard distribution chute adjusts up and down for accurate material placement while an optional swivel discharge allows precise control with distribution to both sides of the tractor. Bales are loaded quickly and easily with the specially designed, self-loading tailgate. The POLYDRIVE® feed rotor drive system offers extra power for tough materials, providing flexibility, reliability and quality performance.

Kuhn North America is a leading innovator in the field of agricultural and industrial equipment, specializing in spreaders, mixers, hay tools and tillage tools. Kuhn and Kuhn Knight branded products are sold through farm equipment dealers throughout the United States, Canada, and many other countries.
